

SWOS Retriever

High Capacity Winch Line for Heavy Equipment

Description

SWOS Carries the high performance Retriever to replace heavier steel winch lines on large equipment such as dozers and excavators. SWOS Retrievers are ideal for recovering stuck or broke down equipment as well as towing objects around the mine site.

The SWOS Retriever fits any high capacity winch and avoids the corrosion and safety issues associated with steel wire rope used by many in the mining industry.

Features

- Capacities Exceeding 100T Available
- Corrosion Free Material
- Extremely Light Weight
- Helps lengthen life of winch
- Optimized for better spooling
- Optimized for Quick Installation
- Payout indicators
- Repairable
- Synthetic button for quick attachment to winch
